

# START A CAREER IN ADVANCED MANUFACTURING

- Put your problem solving skills to use in a flexible career. Positions are open locally in the Finger Lakes area and throughout the U.S.
- Become an in-demand employee making state-of-the-art products.
- Contribute to cutting edge national and international programs in medicine, space exploration, and aeronautics.

## **Certified Production Technician and Foundations in Advanced Manufacturing**

Learn the technical knowledge and hands-on skills needed to be a qualified production technician and prepare yourself for great paying, high-growth jobs.

Foundations in Advanced Manufacturing builds upon MSSC's Certified Production Technician (CPT) certification which consists of 4 stackable credentials: Safety & Employability, Manufacturing Process & Production, Quality Practices & Measurement, and Maintenance Awareness.

**Tuition assistance and  
scholarships available!**
